DETAILED ACTION

1. This action is in response to applicant's amendment received on June 9, 2005.
2. After the telephone interview with the Applicant (see the attached interview summary), the examiner construes that the "means plus function" of claim 1 has met the analysis set forth in MPEP 2181, the Examiner, therefore, construes that applicant wishes to invoke 35USC112, paragraph 6.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

The drill/driver comprise means for automatically periodically momentarily rotating in forward and reverse direction of rotation, and since claim 1 is written in the "means plus function" form, the prior art does not have the equivalent structure to perform the same function as recited in the claimed invention – the reversal of the drill in the Applicant invention is trigger and control via relay and electronic components, on the other hand, the reversal of the device of the prior art (Peisert '208) is relied on the clutch mechanism instead. Therefore, the combination as set forth in the claims are not disclosed, taught, or suggested in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanh K. Truong whose telephone number is 571-272-4472. The examiner can normally be reached on Mon-Thru 8:00AM - 6:30PM.
